

Project Management System

How to run?

1. First of all you need to restore the attached database in MS sql management system.
2. Then open the solution in visual studio.
3. Get the connection string. You can get the connection the way seems you easy I am showing one way to get connection string.

Not the project will be connected to the database.

About the project:-

As we discussed the ambiguity of the requirement document and you said the build the project the way I understand so I am explaining the assumptions I have made in this project.

There are two roles in this project

1. Admin
2. Developer

Admin

Admin is the person who can create a project.

On the projects created by admin the developers can view that project and comment on it but the comment will not show on the project until the admin approves it.

Admin can view the detailed information of the project like the date at which the project created , deadline of the project.

Admin can edit the project

Whenever a new developer sign up on the website his account will not be activate until admin approves his account.

Whenever a developer comment on the project admin will receive a notification when he log in.

Developer

1. After login developer on the home page developer can view all the project like a newsfeed.
2. When the developer click on the project a new page will open that gives the details of the project and show all the comments of the other developers that are approved by the admin.
3. On this page developer can also write a comment which will be shown to the admin and he can approve that comment.
4. Developer can view the details of the projects like title description and whether the project is completed or not and the number of reviews.
5. The logic of number of reviews was not clearly defined in the document so I take the logic that whenever a developer commented on the project it will counted as a review so the review count of that project will incremented by 1.

Screens Of the Project

1. When nobody logged in

The screenshot shows a web browser window with the address bar displaying 'localhost:33374/LoginForm.aspx'. The page title is 'Project Management System'. The main heading is 'Project Managment System' (note the typo). Below the heading, there is a 'Sign Up' link circled in red, with a note 'user can create a new account' next to it. To the right of the 'Sign Up' link is a 'Log in' link. Below the heading, the text 'Sign In' is displayed. Under 'Sign In', there are two input fields: 'Email' and 'Password'. Below the 'Password' field is a green 'Login' button circled in green. To the right of the 'Login' button is a link 'login via an existing account'. At the bottom left, there is a copyright notice '© 2019 - Project Managment System'.

When a developer login

The screenshot shows the 'Home Page - Project Management System' in a web browser. The page title is 'Project Management System'. In the top right corner, there are links for 'Projects Summary' and 'Logout'. The main content area displays a list of projects, each with a date in a green box (OCT), a project name, and a 'View Details' link. The first project is 'College Managment System' with the date '11' and a 'View Details' link. A black line points from this link to the text 'he can only view the project'. The 'Projects Summary' link is circled in black, with a line pointing to the text 'can view the project summary'. Below the project list, there is a Windows taskbar with the search bar and various application icons. The system clock shows 5:10 AM on 10/6/2019.

Date	Project Name	Action
OCT 11	College Managment System	View Details
OCT 10	KKMS	View Details
OCT 15	HRMS	View Details
OCT 15	HRMS	View Details
OCT 1	Customer Relationship Manager	View Details

After clicking view details page

The screenshot shows the 'Project Details' page for the 'College Management System'. The page title is 'Project Management System'. In the top right corner, there are links for 'Projects Summary' and 'Logout'. The main content area displays the project details for the 'College Management System'. The details include: Client Name: The American Schooling System, Project Type: Desktop Application, Dead Line: 2019-10-11 13:09:56.553, and Current Status: Progress. Below the details, there is a 'Comment' section with a text area and a 'Save' button. The system clock shows 5:13 AM on 10/6/2019.

Title	Description	Starting Date	Time left	Number Of Revisions	Current Status
College Management System	Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 1.10.32 and 1.10.33 of "de Finibus Bonorum et Malorum" (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, "Lorem ipsum dolor sit amet.", comes from a line in section 1.10.32.	2019-10-02 13:09:56.553	5	14	Progress

After clicking on the project summary page developer can view the projects , description and the no of review till now.

This is the main detail of the project other things will be understand by looking at the code I have implemented all the concepts written in the documents like query string ,10 webforms, web controls, theme , master page etc.

Best of luck for your project evolution

Don't forget to write a good review on fiverr and 5 star rating.

In future you have any project feel free to contact me also share my id with you college / university friends for their projects.
